Re: Thanks -Data Recovery – Home Computer

Dear Advanced Data Solutions:

I'm sending you this letter to thank you for the fabulous work you performed in recovering data on my home computer hard drive.

As you know, I was installing an additional hard drive into my home system, as well as a new operating system (from Windows 95 to Windows 98) however, when I accessed the BIOS, I must have chosen the wrong hard drive for my system. When I booted, I lost all my data on the old hard disk! Eeeeeeeccccck! And my attempts to recover the data was fruitless!

After talking to the consultants in your office, I was convinced you could at least make an effort to recover the data. One week later, a member of your office called me and told me they could recover everything. Wow, was I thrilled!

It's really good to know that a service like yours is there to help me. You really saved me! I liked your availability via the web also. It's quite convenient.

Thanks again for saving my data.

Sincerely,

Barry E. Jones
