I don't know if anybody can understand what emotions that went through me, when my computer suddenly went down. It was something I've never experienced, so being January 2 year 2000 I thought I was a victim of the y2 bug..

I consider myself very fortunately to have the competent technicians in Advanced Data Solutions get me up and running again. I'm so amazed that you can do this, and very thankful too.

I will recommend you to all my friends.

Thank you,
Soren Majgaard
