To Whom It May Concern:

This letter is a testimony to the ability of Advanced Data Solutions in recovering "lost" data.

My entire hard drive on my personal PC had crashed on a Friday afternoon. After getting the appropriate approval, our Information Services department delivered my crashed hard drive to Advanced Data Solutions on the following Wednesday. Advanced Data Solutions was able to fully recover my "lost" hard drive and all the data it contained. My hard drive was returned to me by Friday of that same week.

I was amazed at the fast recovery time – only two days – as well as the fact that all of my data was recovered.

I would highly recommend their services to anyone needing quick and accurate data retrieval.

Sincerely,

Diane Howell
Quality Management Assistant
