I would just like to thank you for the immediate and friendly services you provide. The importance that you portray to the individual customer makes them feel like their job is the only job that matters. This is the ultimate in customer service.

As you know, the hard drive that runs our casino's entire liquor dispensing system crashed and a casino without alcohol is like a church without a priest. With no idea where to go I called my brother for help. He is the liaison between all the local law enforcement agencies and the FBI for the only Computer Forensics Laboratory in the nation. He, without hesitation, referred me to you - A.D.S. Our in-house computer technician Ray Huerta drove 150 miles to deliver the hard drive personally. When he arrived it seemed that you dropped everything to immediately handle our problem as if it was your own - Again, excellent customer service. I really don't know how to express my true gratitude for the superior job that you performed, but I can tell you that with your attitude and dedication towards the consumer I will have no problems recommending your services to anyone in need.

Sincerely

Rand Sargent
