Advanced Data Solutions,

When my computer crashed at 12:30am, I knew that it was going to be hard to get some to talk to. I placed the call to ADS at 1:30am. By 2:00am, I was speaking with a human, not an answering machine. This is the reason I chose you. I was up, freaking out about the possible problems to come. There was a comforting voice on the other side of the line to talk to me, telling me not to worry. You were up and ready to serve me, so I was up for using your service.

You are the best! Last week was a nightmare. I have been in the computer business for the past eight years. In this time I had never had a situation like this happen. I just opened my new business three months ago, with an instant success. I have four very good clients. Much of my work is creative. I was afraid that I would be sitting at the computer for a good solid two months just to catch up. There was one specific file on my disk that I had spent the last year and a half working on. I don't know what I would have done if I had lost the file. I was afraid I would have to close my business for the next two months just to make everything right.

However, none of that happened. You made it right, right away. You returned to me my business, my soul and my best work. When I spoke with Pam, she told me that 99.5% of the data had been recovered. My hair stood on its ends. I almost cried (I'm an emotional artist-type) I was sooooo happy. I can not even begin to tell you how much grief you saved me. My fiancée also thanks you for the attitude adjustment you gave me. Many margaritas were lifted in a toast to ADS last Saturday. Thank you once again for your awesome work.  
YOU REALLY SAVED MY ASS...
