Dear Friends;

As I read the letters of Appreciation posted on your office wall I realized that my own letter was going to express the exact same feelings of thanks and gratitude for a job well done.

Your company saved ALL of my business records which would have been lost due to my own ignorance. Your employees were professional and extremely nice to me during a time of high stress. Their attitude and competence made a potentially disastrous situation ultimately O.K.

I am pleased and happy that I was only forced to do business "by hand" for one month! Not only was all of my data retrieved but all the important programs which keep my small business running smoothly. I was treated with the same respect and courtesy as a large corporation would have been and I appreciate that consideration.

My heartfelt thanks to everyone at Advanced Data Solutions, and the assurance, that if the need ever arises, I will recommend you to others.

Very truly yours,

Marji Nightingale
