To the technicians at Advanced Data Solutions:

Thank you so much for recovering the data that I thought I had lost when my accounting department went down and everything was unbootable. A lot of important information would have been lost considering we didn't have recent backups. Needless to say I was extremely relieved when I got the recovered information back from your company.

I will definitely recommend your services in the future to anyone who might need them. You're service was quick and somewhat affordable. If I ever come in need of your services again I will be sure to call you up.

Thanks again for your help,

Sincerely,

A handwritten signature in cursive script that reads "Kevin Demarest".
