Attn: Pam Martin

Dear Pam,
I just wanted to send you a word of thanks from our IT staff.

We installed the new Accounting System over six months ago. At that time we, in IT, were told by the accounting manager to begin backing up the new system and not the old system. It was not until the recent failure of the old system that we found out they were still using it.

They were in the final process of conversion when the drive failure occurred. Every bit of updated depreciation information we had was on that drive. It would have been catastrophic and there was no backup.

You really made us look like hero's when the data was returned to us. It saved the accounting staff six months of work, and likely saved the manager his job. Thanks for saving the day.

Craig Morgan
