Re: Civil Engineering Computer Files Recovered

Dear Manual:

This letter is to acknowledge your firm and thank you for the fine work your firm performed on retrieving six months of our work on various civil engineering projects.

According to our usual computer maintenance company, our hard drive had went bad and there was no way they could retrieve the lost data. They had suggested that we contact "Advanced Data Solutions" stating that your firm still may not be able to resolve the problem but it would be worth a try.

Your technicians were a pleasure to work with and not only were they able to retrieve the most important files, but they were able to retrieve almost all of the data files on the hard drive.

We appreciate the time and cost savings your firm prevented us from expending if we were to have to recreate the six months of work we had already completed on our projects. Once again thank you.

Sincerely,

MARTIN & MARTIN
